

MULTI-MODAL TRANSPORTATION *Lincoln, Nebraska*

September 2004

Dear Mayor Seng:

On behalf of the Mayor's Multi-Modal Transportation Task Force, we are pleased to provide you with this Final Report from the "Multi-Modal Transportation Study." This Report summarizes months of hard work by dozens of individuals and reflects the ideas of hundreds of Lincoln and Lancaster County residents who participated in this process.

As expressed in our "Vision Statement," we believe the concept of multi-modal transportation is all about giving people **TRANSPORTATION CHOICES** that provide quality **MOBILITY** for all generations. Our vision seeks to expand the economic and social **OPPORTUNITIES** by linking individuals and families with jobs, recreation, medical services, education, shopping, and cultural activities.

Many of our recommendations call for immediate action by the elected officials of the community. Other recommendations – though no less important – will take many, many years to bring about. We have organized our recommendations into four major areas:

- ◆ Public Transportation
- ◆ Multi-Use Paths, Pedestrians and Bicycles
- ◆ Land Use and Development
- ◆ Administration and Management

We encourage you and the other elected officials to take a serious look at the broad community benefits to be derived from implementing these recommendations. It has been our pleasure to serve the City and County and we thank you for allowing us this opportunity to participate in this most critical and valuable endeavor.

Respectfully Submitted,

Kit Boesch
Margaret Hall
Bill McCoy
Patte Newman

Nye Bond
Elaine Hammer
Tad McDowell
